

## 1.2 For OC3 Users

OpenClinica 4 has a modern, user-friendly interface that is easy to use and includes built-in, context-sensitive help. Customer accustomed to working in OpenClinica 3.x will see many familiar screens and concepts, but in many areas a brand new user interface--including new study and form building tools. This toolset can deliver dramatically shorter timelines for your study builds, and allow you to deploy case report forms that are highly dynamic, mobile-friendly, and autosave your data. Click [here](#) to see a more complete comparison between the different editions. [Contact us](#) for bridge training.
