

1.2 For OC3 Users

OpenClinica 4 (OC4) features a modern, user-friendly interface that is intuitive and easy to navigate. Built-in, context-sensitive help is available throughout the system to guide you as you work.

Users familiar with **OpenClinica 3.x** will recognize many of the same concepts and workflows, now presented with an updated interface and enhanced functionality. The new study and form design tools streamline study build activities, helping you create and deploy studies more quickly.

OC4 enables you to build **dynamic, mobile-friendly case report forms** that **autosave data** and support complex study designs—significantly reducing study build timelines.

For a detailed comparison of editions, see [Comparing OpenClinica Editions](#).
