

15.1.4 Adding a Subject to More than One Study

After adding a Subject to a Study in OpenClinica, the Subject can participate in other OpenClinica Studies. Add the Subject to each Study, using the same Person ID. When you add a Subject to a second or subsequent Study, OpenClinica presents you with a confirmation screen, and ensures that the Sex and Date of Birth for that Subject match the values already in the database for the Subject.
