3.1.2.2 Find and Organize SDV Data

In either the CRF or Subject view, you can:

- Navigate through the table pages and change the number of CRFs or Subjects shown per page
- Show more data for all rows, or hide it
- Filter the data in the table so it shows only the CRFs or Subjects you want to see

These features work the same way as in the Subject Matrix: for more information, see Find and Organize Data in the Subject Matrix.
