

5.2.3 Monitor and Manage Data Module - Permissions

To access the monitoring features in the Monitor and Manage Data module, your User Role must be Monitor, Data Manager, or Study Director. For information about features in the module, see [Monitor and Manage Data](#).

The features within the module that you can access depend on your User Role and User Type:

| Role | Features | Notes |
|--------------------------------------|--------------------------|---|
| Monitor | Subject Matrix | Can only view. Cannot make changes to information. |
| | View Events | Can only view. Cannot make changes to information. |
| | Source Data Verification | No restrictions. |
| | Study Audit Log | No restrictions. |
| | Notes and Discrepancies | Can create only the Query type of Discrepancy Note. Can only update or close an existing Discrepancy Note. |
| Study Director or Data Manager | Source Data Verification | No restrictions. |
| | Study Audit Log | No restrictions. |
| | Rules | Study level only. |
| | Group | Study level only. |
| | CRFs | Study level only. User Type must be "business administrator" or "technical administrator" to edit, remove, restore, or delete CRFs. |
