15.1.1 Creating a CRF

For this example, a very simple CRF was created containing only three fields: Height, Weight, and BMI.

	A	B	C	D
1	ITEM_NAME	DESCRIPTION_LABEL	LEFT_ITEM_TEXT	UNITS
2	HEIGHT	Height	Enter Height:	inches
3	WEIGHT	Weight	Enter Weight:	lbs
4	CALCULATEBMI	Calculated BMI	Calculated BMI: <script	
5				
6				

Notice that the LEFT_ITEM_TEXT contains the text that will be visible (ie Enter Height:) along with **<div ID=> **. This script provides an identifier for each field and will be referenced by the calculation script.
