

12.2.1.1 Additional Tips

Adding a bulleted list to the Left Item Text may result in spacing issues, as shown below.

JQuery can be used to avoid a spacing issue. The following JQuery, when added to the Instructions column of the Section, will increase the width of the Left Item Text and set the text to left-alignment:

```
<style type="text/css">.aka_text_block{width:200px;text-align:left;}</style>
```

After making this change, the list is much easier to read:
