

2.5 Module Management

You can activate modules to add specific functionality to your study. Available modules are displayed on the **Modules** screen with a brief description of what each does. Click **Learn More** on any of the module cards for more information on a specific module.

To Activate Modules:

1. Click the **Settings**  icon on the **My Studies** screen, **Design** screen, or **Share** screen.
2. Determine which module(s) you would like to activate and click the **Learn More** link to read about the module before requesting access.
3. Click **Request Access** to begin the activation process.

The screenshot shows the 'Modules' tab in the OpenClinica interface. It displays five module cards, each with a title, description, icon, and a 'Request Access' button. The cards are: 'Unite - EHR Integration', 'Participate', 'Insight', 'Randomize', and 'eConsent'. Each card also includes a 'Learn more' link. The 'Participate' card has a 'Request Access' button highlighted with an orange box. The 'eConsent' card also has a 'Request Access' button highlighted with a blue box. A question mark icon is visible in the bottom right corner of the interface.

Unite - EHR Integration

OpenClinica Unite pulls medical data from third-party sources into the OpenClinica EDC, reducing the burden on clinical research coordinators, eliminating transcription errors associated with high-risk manual data entry, and mitigating the cost and effort of monitoring. [Learn more](#)

Participate

With OpenClinica Participate, you have total control over when forms are available for each subject, and the data is captured in real time. The underlying audit trail offers objective evidence that the subjects completed the forms in the timeframe dictated by the protocol. [Learn more](#)

Insight

Intelligent, visual reporting of all your data has arrived. OpenClinica's Insight module turns data into analytics and action. [Learn more](#)

Randomize

OpenClinica's Randomize module allows you to conveniently randomize from within your OpenClinica study. Full configuration support and training provided. [Learn more](#)

eConsent

OpenClinica eConsent enables patients and caregivers to use their own devices (no app needed), and fully comply with 21 CFR Part 11 signature requirements. Study sites can use eConsent to deliver a multimedia-rich, educational experience to ensure participants fully understand study requirements to make informed decisions. [Learn more](#)

Once you request access, the OpenClinica team will enable the module after confirming it is included in your contract. If the module is not already in your contract, Customer Support or Sales will let you know and will be happy to review the module with you to ensure your contract includes everything you need to use OpenClinica to its fullest!
